

## GAS MIXTURES IN ACCORDANCE WITH CUSTOMER SPECIFICATION

We offer insulating gas mixtures based on C4-FN with carrier gases such as CO<sub>2</sub>, N<sub>2</sub> or O<sub>2</sub> supplied in pressure vessels of various volumes. These mixtures can be supplied partially liquefied or in gaseous form, depending on your requirements. For this purpose, either C4-FN new gas or gas reconditioned by DILO in new gas quality is used, guaranteed by the DILO Certified Gas quality promise.

### Your benefits:

- Complete handling of the ordering process: From the calculation of the individual gas quantity to the transport on site
- Economical and fast procurement even for small gas quantities
- No need to use individual gases on site
- Collection / dispatch in vessels rented or purchased from DILO or customer's own pressure vessels

### Production:

- Gravimetrically in mol-% to achieve permanently high mixing accuracy
- Traceable to the international unit system
- Quality standards through regular calibration of the measuring systems and certified processes

### Our standards:

- Every gas mixture is supplied with a safety data sheet in accordance with (EC) 1907/2006
- Use of exclusively TÜV-approved pressure vessels
- Analytical verification of every gas mixture in the DILO in-house laboratory using gas chromatographic and mass spectrometric measurement methods.
